

# **Research Instrument: Structured Questionnaire**

## **Study Title: Analyzing Factors Influencing Women's Empowerment in Freelance Work Through Machine Learning Models**

### **1. Overview & Objective**

The primary objective of this survey is to investigate how training exposure, digital literacy, patterns of AI adoption, and professional satisfaction collectively contribute to the empowerment of women in the global gig economy. This instrument was designed to gather empirical data to analyze the intersection of technology and career autonomy using machine learning techniques.

### **2. Informed Consent Statement**

By completing this questionnaire, you acknowledge and agree to the following:

- Participation in this survey is entirely voluntary.
- All responses are collected anonymously. The data will be handled with strict confidentiality and used exclusively for academic research purposes.
- Results will be reported in aggregate form, and no individual identity will be disclosed.
- Participants are free to withdraw from the survey at any point prior to submission without any penalty.

### **3. Instructions & Scale Definition**

Please read each statement carefully and select the response that best describes your perspective or experience. For Sections B through E, please indicate your level of agreement with the provided statements using the following 5-point Likert Scale:

- 1 = Strongly Disagree
- 2 = Disagree
- 3 = Neutral (Neither Agree nor Disagree)
- 4 = Agree
- 5 = Strongly Agree

### **4. Survey Sections**

#### **Section A: Demographic Information**

##### **Place of Work:**

- From home
- Coworking spaces
- Completely remote

##### **Gender:**

- Female (This survey is intended for women freelancers only.)

**Age:**

- 18-25
